1. This communication is in response to Applicants' Response to Office Action Dated April 22, 2004 mailed on 22 September 2004. Claim 17 was amended; claims 5, 13, 19, and 26 were canceled. Claims 1-4, 6-12, 14-18, 20-25, and 27-29 are pending.

Withdrawal of Rejections Under Section 112

2. Applicants' arguments are sufficient to remove the rejections under Section 112, first paragraph.

Examiner's Amendment

3.1 An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

This Examiner's amendment corresponds to the cancellation without prejudice of two claims in response to the restriction of claims as described below. Authorization for this Examiner's amendment was given in a telephone conversation with Mr. James V. Mahon, Reg. No. 41,966, on 11 January 2005.

3.2 The application has been amended as follows:
Cancel claims 17-18 and 20-22.

Art Unit: 2123

Reasons for Allowance

4. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The closest prior art of record shows:

(1) a CAD system including annotation placement rules governing the placement of annotation data (Watanabe et al, U. S. Patent 5,701,403);

(2) a three-dimensional model with three dimensional pointers that move or rotate with the model as the model is moved or rotated (Russell, Jr. et al, U. S. Patent 5,526,478);

(3) a CAD system including generating updated drawing documents having generated tag data and input for annotations (Harrison et al, U.S. Patent 6,611,725); and

(4) a graphical editor that constructs groupings of annotation graphics and object parts (Lieberman, "Graphical Annotation as a Visual Language for Specifying Generalization Relations").

4.1 Applicants' first set of claims consists of claims 1-4, 9-12, and 23-25.

Independent claim 1 is directed to a method for displaying representations of objects; independent claim 9 is the corresponding apparatus claim and independent claim 23 is the corresponding computer program product claim. Each independent claim identifies the distinct limitations of: "receiving input from a user specifying movement of said leader line" and "calculating a trace of possible placement points for attachment of the leader line to the object."

Art Unit: 2123

Because the closest prior art does not appear to teach or suggest the calculation of a trace of possible placement points for attachment of the leader line, claims 1-4, 9-12, and 23-25 are deemed allowable.

4.2 Applicants' second set of claims consists of claims 6-8, 14-16, and 27-29.

Independent claim 6 is directed to a method for displaying representations of objects; independent claim 14 is the corresponding apparatus claim and independent claim 27 is the corresponding computer program product claim. Each independent claim identifies the distinct limitations of: "determining the type of said annotation, and retrieving annotation placement rules information stored in said system pertaining to said type of annotation" and "determining from said retrieved information whether the plane chosen by the user for said annotation is consistent with said retrieved information."

Because the closest prior art does not appear to teach or suggest the determination of plane consistency based on annotation placement rules, claims 6-8, 14-16, and 27-29 are deemed allowable.

5. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
